# It will convert USB port to COM port

Next you need to connect the USB ADAPTER to computer and control panel wire of heater

# When thats done you can launch programm TDT\_ENG

### Then the TDT asks you to chose adapter (standart is Port: COM 3)

	ase IDI_ENG	21.04.2010 10:00	Lietojumprogram	ö
;	🗾 USB-Adapter	06.06.2016 20:04	Adobe Acrobat D	12 9
:ote	Choose adapter × Port: COM3  COM3			
;				
ote				

### If it's right port press OK and TDT will open new window

## 1)Set the ventalation mode on

# 2)Adjust power mode

3)Choose Workmode

- Prev. Value (sets the last settings)
- T plate (reads temperature from heater)
- T RC (reads temperature from control panel)
- Ext. T sensor (reads temperature from external temperature sensor[optional])
- Power (works on power scale)

4)Set the temperature for Tempareture mode

5)Set work time (unlimited or minutes)

6)Accept Settings

7)Start heater

8)Stop heater

9)Get EDR

When you press Get EDR new window will pop up and you will be able to see all information about heaters working times and fault codes, faulty starts and so on
